Timeware Primetime Solution
Release Notes

Version 6.9.2.08

Scheduled Release Date: 06/30/2009

The Timeware Primetime release notes document describes changes made to the system since the last official release of the product. The release notes are organized under 4 sections: User Reported Issues, Additions & Enhancements, Reporting Issues and Reporting Update.

Should you have any comments or feedback regarding the content of this document or should you have any suggestions for us to improve the content or delivery method of this document please let us know. We thank all our clients for their continued support and participation.

User Reported Issues:

- User reported that edit fields default to overwrite which makes it difficult to modify text by inserting. Corrected this issue in this release..

Additions & Enhancements

- Application modules that are not used still are displayed and confusing. We implemented a module display controlled by the license number which enables/disables modules based on clients needs.

Reporting issues

- Time Charge Detail report does not include charge notes. Added charge notes to Time Charge Detail report in this release.

Reporting Update:

- In order to improve Primetime server and reporting efficiency and eliminate reporting exceptions, we separated all reporting functions into its own server which operates on port 8084.
- Added payroll export report to certain export types.
